Simple. Effortless. Intelligent

Print management solutions are at the heart of the MFC-L9670CDN, with Secure Print Plus, Cloud Secure Print, Barcode Print Plus and Dedicated UI as standard, you can securely print, automate and personalise workflows straight away. You also have the option to further integrate your device with third-party solutions, to intelligently manage, secure, and govern your documents through unified capture and print workflows.

Secure by design

To support the ever-evolving increased legislation on privacy and data security, the MFC-L9670CDN has built-in support for the latest industry-standard security protocols to keep your data secure. Identity management and access controls help to reduce risk with selective user restriction and allows authorised employees or groups to get instant access to specific settings and functions they need.

When quality and performance work together

Our most advanced colour printing technology is guaranteed to make the right impression when it counts, with vibrant, professional colour prints and accurate digital documents. The robust design, upgraded memory and long-life components provide confidence that your device will keep on performing without interruption.

Flexibility for the office

Designed to fit into your work space and meet your specific print and scan requirements, the MFC-L9670CDN is available as a low-profile desktop printer and easily transformed to a highly efficient floor-standing model by simply adding optional paper trays and storage cabinet.

Contract printing that looks after itself

The MFC-L9670CDN provides excellent value with a low Total Cost of Ownership (TCO) and competitive Cost Per Page (CPP). Let us take care of your printing needs with a number of Managed Print Service (MPS) options offering automated supplies replenishment and break-fix services, reducing downtime and maximising productivity - for total peace of mind.

Solutions enabled

Personalised touchscreen experience

Improve efficiency and tailor frequently used functions to your exact requirements. Simply log in to the device and have your individual user based shortcuts on the home screen.

Secure documents with ease

Secure Print Plus, is a smarter, safer way to print your confidential business documents and can integrate seamlessly with the inbuilt card reader for a low touch print job release solution. Sensitive documents are only printed when you're ready and can only be collected by authorised staff.

Cloud Secure Print, is a convenient built-in feature which enables you to easily send documents to print when you're away from home or the office. Remotely submit the print request via email to a Brother device with an active internet connection and securely retrieve print jobs when you are ready. Documents will only be printed when the sender enters a unique password on the destination device's control panel.

Print barcode fonts from your device

Barcode Print Plus extends printer language intelligence with enhanced support for barcode standards. Using a software with built-in barcode generation, quickly and accurately add 1D and 2D barcodes to printed document outputs.

Unlock new possibilities with a range of business solutions

Whether you already use print and document management software or would like to understand how specialist print software can automate workflows and improve efficiency and security, we are here to help.

You have the option to upgrade your device with intelligent Brother and third-party solutions, including integration with industry leading providers Kofax and YSoft. This gives you complete flexibility in how you manage, secure and control your documents.

We work closely with our software partners across print management and document capture to integrate solutions to transform your workflows. When we partner with a software vendor, we ensure your MFC-L9670CDN works even harder to meet your needs.

Wireless Setup Support¹⁸

Wi-Fi Protected Setup (WPS)

Display IP Address

The dynamic IP assigned to your device can be displayed on the home screen

Security Features

E-mail Notifications

Automatically have the device send e-mail alerts when it requires attention, such as when the toner is low or needs replacing

E-mail Reports

Receive usage reports on a regular basis via e-mail

Automatic Intrusion Detection

All Brother Print devices are secure by design. Devices automatically recognise security attacks and take preventative measures, including rebooting where necessary, to ensure the device remains secure

Firmware Updates

In addition to allowing automatic updates to the latest version the printer can be set to not receive older firmware versions to avoid downgrade by an unauthorised user

Cloud Secure Print¹²

Enables password protected driverless print job release

On-Premise Active Directory/LDAP Authentication

Utilise existing infrastructure to restrict access to Brother devices using AD/LDAP. Staff can easily use their existing network login credentials to authenticate

Port-based Network Access Control

(IEEE 802.1x)
Brother devices are in full compliance with this standard, to allow connection to an 802.1x EAP (Extensible Authentication Protocol) protected network

Restrict network protocols

The Protocol Control feature allows an administrator to restrict communication protocols (e.g. FTP, Telnet) as required

Store Print Log

Allows audit of a print log file saved to CIFS server. Record ID, type, name, user, date, time, page count for every print job

Setting Lock

Secures access to the devices control panel by locking it

Secure Key Management

Use the default standard self-signed, create a custom self-signed certificate, certificate signing request (CSR), or external public certificate & private key for protected network communication

Secure Function Lock 3.0

Use a 4 digit pin or a password to identify and authenticate an individual or groups of users over a network. Allows access control for up to 200 users

Digitally-signed Firmware

The firmware for Brother print and scan devices is digitally signed and secure

Syslog

Allows IT Admin to access a single application (SIEM tool) to get device status updates for audit purposes over Syslog

Near-Field Communications (NFC) / Card Reader Support

Integrated NFC Reader
Supported NFC standards include: (ISO14443 Type A) MIFARE Standard/Plus/Ultralight/Ultralight C/DESfire my-d move, Tag-it (ISO15693 Type B)
