DISCOVER THE FULL COLLECTION

As part of our 2026 collection, we introduce a new range
of wooden knobs and handles.

Each design explores how wood behaves when shaped into
functional details — how it softens form, absorbs light, and creates
a more tactile experience at the point of contact.

All new designs are introduced in Nordic Oak,
a finish that brings clarity and calm to the wood — letting grain, tone,
and surface exist in quiet harmony.
