

The 396 RC is a professional trimmer head with "bump and go" line extension and "RC System", to make easy the re-spool without the use of addition accessories. It's also equipped with incorporate bump knob. Adaptable for all brush cutters in the market. It has the same characteristic of F-ONE, except the "Line Shielder".

- **"RC System"**: easy re-spooling system;
- Large capacity spool: up to 12 m of line Ø 2.4 mm round profile;
- Bump knob never blocks: in the 396 RC the whole lower body acts as a bump knob, eliminating the possibility of external bump knob locking due to debris;
- **Bump and go** line extension;
- Takes line up to dia 4.0 mm.

### RC SYSTEM: EASY RE-SPOOLING WITHOUT THE USE OF ADDITIONAL ACCESSORIES

1 - Line up the arrows on the upper body with the eyelets.

2 - Insert the line into the eyelet until it comes out on the opposite side.

3 - Turn the top and the bottom in opposite directions to wind the line.
