Adobe PDF

The AV5200 is Avision's next generation of A3 document scanner. Based on CIS (Contact Image Sensor) technology, the scanner is much more slimmer compared to traditional scanner with CCD design.

Capable of scanning up to A3 size, the slim AV5200 is perfectly suited to scan complete book spreads, two letter-sized pages (simultaneously), large-format magazines, legal-sized documents, photographs and more, all in brilliant color.

In addition, the scanner comes with the convenient feature of multiple images cropping. With this feature, various sizes of documents such as photos, ID Cards, or business cards can be placed on the flatbed and the scanner is able to crop and create multiple images according to the original sizes of the documents in one single scan.

The Avision AV5200 is a high-speed and high-performance scanner capable of processing A3 sized paper. It is capable of performing duplex scanning and has a USB 2.0 interface . If large amounts of paper need to be processed, purchase the built-in auto-document feeder which accommodates a batch of 50-page document to be scanned continually at one time. At a scanning rate of 25 pages per minute in simplex mode and 50 images per minute in duplex mode, the Avision AV5200 is truly a scanning powerhouse to meet all your scanning needs for A3-sized documents.

What we have bundled

AvScan 5.0

-The Intelligent Document Management Tool

The AvScan 5.0 main screen

Document Imaging is the very first step of Document Management. However, poor quality images can cause serious problems to later indexing or storing processes. It may increase scanning labour costs and lowers the OCR accuracy. AvScan 5.0 ensures all documents are checked and polished at the time they are scanned such that the image quality is guaranteed before they are ready to use for other purposes.

AvScan 5.0 is an intelligent scanning and electronic filing solution. AvScan 5.0 possesses distinct features that convert and index scanned information into electronic documents for easy storage and fast retrieval.
