WorkForce DS-510

The WorkForce DS-510 is a document scanner, designed for a variety of demanding organisations and sectors, such as government, bank, healthcare and small businesses. With high scanning speeds and fast data processing features, this sheetfed scanner is ideal for easy document workflow. Multiple users can share the WorkForce DS-510 and benefit from PushScan features using the optional Network Interface Box.

High-speed scanner
This document scanner features a compact footprint and high speed scanning of up to 26ppm / 52ipm, even at 200 and 300dpi in colour or monochrome. This, combined with hardware JPEG compression, makes large scan jobs faster to process. With the optional Network Interface Unit[1], the WorkForce DS-510 is ideal for sharing across office/department networks.

Document workflow
Epson Document Capture Pro makes it easy to integrate this business scanner into your document management system, speeding up workflow and enabling you to capture, convert and distribute scanned information into your document repositories. In addition, barcode recognition and Zonal OCR will help automate large document processes, such as file naming and folder creation. The WorkForce DS-510 is easy to integrate thanks to TWAIN, ISIS and WIA driver support.

Efficient
Epson Scan software offers a wide range of advanced document imaging features, including multi-document size detection, text enhancement and automatic de-skew to improve efficiency and increase productivity.

Network sharing
Share between multiple users using the optional Network Interface Unit. Combined with Document Capture Pro software, the Network Interface Unit allows you to customise 'scan to' job commands, such as 'scan to' Microsoft SharePoint[TM] among others, from the scanner's panel.
