

Bit-Check 10 Impaktor 1 SB, 10 pieces

Bit-Checks Impaktor

EAN:	4013288158574	Size:	200x95x16 mm
Part number:	05073980001	Weight:	135 g
Article number:	Bit-Check 10 Impaktor 1 SB	Country of origin:	CZ
		Customs tariff number:	82079030

- Upright positionable, multi-component Bit-Check
- Impaktor technology for above-average service life
- Particularly suitable for use with customary impact drivers
- Diamond coating for a secure fit in the screw, literally bites into the screwhead to prevent cam-out
- Holder with ring magnet for holding longer and heavier screws

1 Impaktor holder with retaining ring and ring magnet, 9 Impaktor bits. The Impaktor technology offers an above-average service life even under extreme circumstances thanks to the best possible utilisation of the material properties and the optimised geometry; particularly suitable for use with customary impact drivers; holder with ring magnet for simple holding of longer and heavier screws, ideal for overhead work. The rough diamond-coating of the bits reduces the risk of a slipping out of the screw head thanks to the enhanced frictional resistance.

Bit-Checks Impaktor

Set contents:

At the workplace

The Bit-Checks can be positioned upright at the workplace so the tool is always quickly to hand.

Improved productivity

For use with impact screwdrivers. Improve productivity when screwdriving with power tools.

Above-average service life

Maximum utilisation of the material properties, a very special geometry – designed particularly to meet the extreme demands – as well a specific manufacturing process mean that Wera Impaktor tools have an above-average service life.

Impaktor-Bits

For an above-average service life. Maximum utilisation of the material properties, a very special geometry – designed particularly to meet the extreme demands – as well a specific manufacturing process mean that Wera Impaktor tools have an above-average service life. Another product advantage is the coating of the Impaktor bits with minute diamond particles. These diamond particles reduce the cam-out effects – particularly high in power tool applications – which can lead to a slipping out of the screw head. The diamond particles literally bite themselves into the screw recess. This means that less contact pressure is required, something that greatly delays fatigue setting-in in power tool screwdriving jobs.

Torsion zone

Torsion zone specially designed to absorb such forces and thereby protect the bit tip.

Impaktor holder with ring magnet

The Impaktor holder with ring magnet additionally holds longer and heavier screws absolutely securely. This enables a speedy and dependable positioning of the screw. It is also ideal for above-head work. Should the magnet function not be required in a particular situation e.g. when working with metal, it can be extracted from the screwdriving area and can thereby be "disabled". Mainly used in manual power tool applications.

TriTorsion system

The combination of the double torsion zones in the Impaktor holder and the torsion zone in the Impaktor bit result in the so-called TriTorsion system.

"Take it easy" tool finder system

The "Take it easy" Bit-Checks have bits with a sleeve which – from its colour (e.g. red = Phillips) and size designation – make it simple to access the right bit quickly.
